DETAILED ACTION

Allowable Subject Matter

1. Claims 22-26, 29, and 32 are allowed.
2. The following is an examiner's statement of reasons for allowance: the examiner is unaware of any prior art which suggests or renders obvious a field effect transistor with an epitaxial region of a first conductivity type with a first region of a second conductivity type opposite to that of the first conductivity type that is within the epitaxial region and under a first portion of a first gate region which extends at least halfway through the epitaxial region as well as having a second region of the second conductivity type within the epitaxial region under a second gate region which extends at least halfway through the epitaxial region such that there is an additional region of a first conductivity type between the first and second regions as suggested in claim 22. The examiner is also unaware of any prior art which suggests or renders obvious a field effect transistor having a gate, source, and a drain region with an epitaxial region of a first conductivity type such that a semiconductor material of a second conductivity type opposite to that of the first conductivity type is under the gate and extends in the epitaxial region at a depth which reduces the drain to source resistance of the transistor while also having a first region under a first portion of the gate which extends at least halfway through the epitaxial region as well as having a second region under a second portion of the gate which extends at least halfway through the epitaxial region as suggested in claim 29.

Art Unit: 2826

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
